

HOW MONEY RELATES TO THE THINGS YOU (REALLY) WANT IN LIFE

THE MONEY EXPERIENCE

But...
HOW DOES money EVEN
WORK?!

**MONEY
EXPERIENCE**

WE BUILT A BETTER WAY TO TEACH FINANCIAL LITERACY

Designed for high school and college students aged 16-24 years old, **Money Experience** helps students understand the relationship between their decisions about money and their quality of life.

Instead of emphasizing math, we concentrate on teaching critical financial concepts through interactions with relatable characters in a graphic novel format. Along the way, students test their assumptions about their future through a life simulator developed by financial experts, business managers, and professional educators, and based on REAL historical costs, incomes, interest rates, and financial metrics in the US, the Simulator's underlying model is a highly sophisticated and unusual tool developed solely for the Money Experience.

Money Experience Curriculum is divided into 10 lessons that cover the whole arc of life decisions - from going to college, getting a job, buying a house, and having a family, right through retirement planning. Designed as ten 45-minute units, our curriculum can be taught as an intensive 2-day workshop, one-week camp, or as an after-school class during the semester.

For more information or to bring **Money Experience** to your group, contact us at admin@favorandwealth.com or 1-855-732-8673

HOW IT WORKS

COLLEGE | budgets | Student loans | Advanced degrees | banking | car buying credit | 401k | careers | travel | Cost of living | Lifestyle creep | taxes | marriage | kids | insurance | 529s | Healthcare | fixed incomes | aging with dignity | investments

1. RANK PRIORITIES

Students get their priorities in order, literally. By knowing what is most important to them, we can offer more personalized personal finance education.

2. READ THE GRAPHIC NOVEL

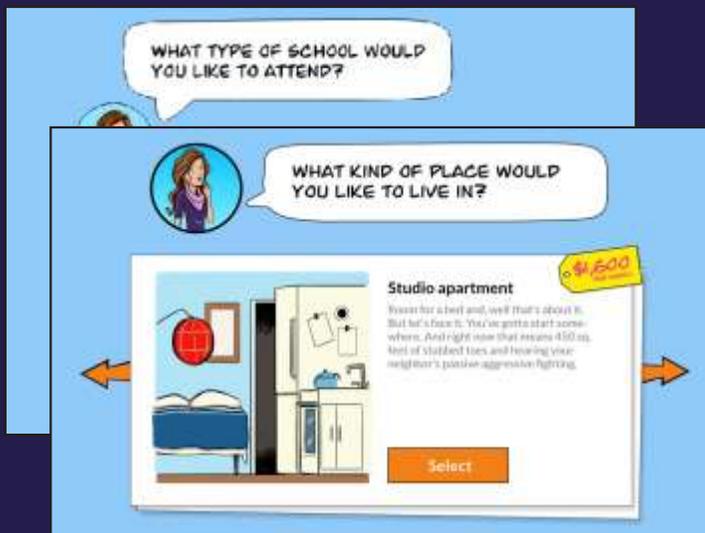

Students will follow a core cast of characters who encounter many of life's most common challenges, and provide critical emotional context around moments that might otherwise be hard for a student to imagine.

3. DISCUSS!

A classroom facilitator leads discussion and group exercises that deepen a student's understanding of abstract financial topics.

HOW IT WORKS

4. MAKE DECISIONS

Imagine your life deep into the future. The simulator will crunch the numbers and let you know what your choices mean for your lifestyle, happiness and financial health.

THE SIMULATOR

Underlying the Money Experience is a unique financial "supermodel" that takes almost all of the major life and financial decisions made by a person and models the outcomes in your life. From college choices to home loans, cars, marriage, kids, health expenses and retirement, the Simulator not only measures financial outcomes, but also evaluates how you're doing in terms of Quality of Life. What does that expenditure mean in terms of meeting your family, free time, or charitable goals? It's NOT just about money!

Developed by financial experts, business managers, and professional educators, and based on REAL historical costs, incomes, interest rates, and financial metrics in the US, the Simulator's underlying model is a highly sophisticated and unusual tool developed solely for the Money Experience.

5. SEE RESULTS!

Our financial "Supermodel" crunches the numbers and delivers results around quality of life, net worth, budget & spending, retirement savings, investments and more. Students see the consequences of their actions displayed as insights projected well into their future.
